#### Criteria Ratings Pts

This criterion is linked to a Learning Outcome Functionality - Dynamic and interactive pages that enable a user to search one or more tables with a minimum of two search criteria.

13.0 pts

This criterion is linked to a Learning Outcome Functionality - Dynamic and interactive pages that enable a user to add one or more records to one or more tables.

16.0 pts

This criterion is linked to a Learning Outcome Functionality - Dynamic and interactive pages that enable a user to update/modify one or more records in one or more tables.

16.0 pts

This criterion is linked to a Learning Outcome Functionality - Dynamic and interactive pages that enable a user to delete one or more records in one or more tables.

10.0 pts

This criterion is linked to a Learning Outcome Security and State - Secured pages that can be accessed only by authenticated users; login functionality (i.e., to authenticate a user); logout functionality (i.e., to terminate an authenticated user's session); state management (i.e., the use of session variables and/or cookies to maintain state).

20.0 pts

This criterion is linked to a Learning Outcome Business Rules and Validation – adherence to the proposed business rules (e.g., should not be able to register for more than 18 credit hours); use of appropriate validation checks (e.g., required fields, correct data types, range checks) to ensure an error-free user experience.

8.0 pts

This criterion is linked to a Learning Outcome Database – Minimum of five tables that are normalized; primary keys are defined; referential integrity is set; and all five tables are used by the application.

7.0 pts

This criterion is linked to a Learning Outcome Design – general site appearance, clear and logical navigation capability, appropriate choice of controls and images, page titles, consistency in the use of fonts, colors, style and layout, spelling and grammar, intuitive and easy to use interface.

5.0 pts

This criterion is linked to a Learning Outcome Completeness - to what extent and how well the proposed functionalities are incorporated; to what extent the project has a professional “look and feel” and is ready for deployment.

5.0 pts

Total Points: 100.0
